TAKE ACTION AGAINST SPRING ALLERGIES!

HERE IS A SPECIAL THAT WILL HELP!

Amylase

People who suffer from airborne allergies are experiencing histamine reactions. Amylase works as a natural histamine blocker, which can be very beneficial in relieving hay fever, asthma, sinus conditions, rashes, hives, insect bite reactions, and other allergy-related symptoms. Amylase: The must-have for allergy season.

MSM

"For allergy sufferers, MSM is very good news. After many years of treating pain patients with MSM, it has become clear that perhaps the single most powerful benefit it offers is quick relief of the symptoms of common allergies." Excerpt from "The Miracle of MSM - The Natural Solution for Pain", available through NCP. Relief from Asthma and Sinusitis discomfort are among other reported benefits.

Vitalase

Color your way to health with Anthocyanins, the substance that gives vibrantly colored fruits and vegetables their vivid hues. This pigment is where the disease fighters are found in these powerful flavonoids.

Anthocyanins are free radical scavengers and antioxidants that battle against vascular disease, bacteria, viruses, cancer, inflammation, and allergies.

Liquid O²

Oxygen has a powerful role in maintaining our health through the process of oxidation. This is a process in which the body chemically converts nutrients into energy, and rids itself of toxins. When the body is deprived of oxygen, the immune system is weakened. With an insufficient amount of oxygen to support a healthy cell, the cell turns to another source of energy. This leaves the body open to an invasion of viruses which can lead to degenerative health conditions.
